| 40. The boy had been by his mother. | |
| a. corresponded | b. decreed |
| c. abandoned | d. demystified |

Part B: Read the following texts and answer the questions.

Text 1:

Sasakura Engineering introduces the Sasakura Pre-Treatment (SPT) unit, for use on board ships. Bilge water, the water that collects in a ship's hold, is so full of oil and sludge that it must undergo preliminary treatment before it can be purified. The conventional machine for this purpose relied on gravity to do most of the work on particles in the water, but the SPT unit makes unprecedented use of what is known as the air-bubble floatation technique. A diffusing mechanism introduces bubbles into the water. As they rise, they collect oil and sludge, bringing it to the surface. The new machine is smaller, and its process less time-consuming, than the conventional one. Moreover, it can be operated continuously and requires no maintenance.

استفاده از:

41. We can infer from the passage that
- water must not collect on board ships.
 - sludge is added to water before it is used.
 - sea water must be purified before it is used.
 - bilge water is healthier than purified water.
42. According to the passage,
- SPT is better than conventional water treatment machines.
 - air- hubble floatation technique is not modern.
 - oil and sludge are necessary for board- ship water.
 - SPT is not as fast as other water treatment machines.
43. The word "introduce" in the first line means
- bring something into use for the first time.
 - make somebody known to someone else.
 - make something clear.
 - give details of something.

Text 2:

1. The theme of cultural integration in relation to language is well illustrated by the French-speaking Canadians. Concentrated in the province of Quebec and numbering over 6 million, these *Canadians* are descended from French colonists who arrived in the 1600s and 1700s. From 1760 to 1867, they lived under English rule; and since 1867, Quebec has been part of Anglo dominated Canada. Throughout the period of English rule, the French Canadians maintained their language and culture, successfully resisting assimilation. In 1980 about half of the French speaking population of Quebec voted in favour of seeking sovereignty for their province.

2. The French language survived in large part because of religious factors. Its survival is an excellent example of the integration of speech and faith within a culture. Most other Canadians are protestant. The French Canadians are Roman Catholics, and the Church provided social cohesion, a cultural rallying point. French language and culture were preserved in the numerous rural Catholic churches and church schools of Quebec.

استفاده از:

3. In time, the linguistic and religious solidarity of the French Canadians found a political expression centered in their attachment to the province of Quebec. For many decades, government of the, province was dominated by English-speaking administrators, but a political awakening allowed the *Canadians* 'to gain political control of Quebec. As a result, the province is politically different from the rest of Canada, and in some ways it now resembles a state within a state. The laws of Quebec retain a dominantly French influence, but the remainder of Canada adheres to English common law. The provincial flag, adopted in 1948, preserves the old fleur-de-lis symbol of the French kings. French is a legal language in Quebec (and throughout Canada), and most *Canadians* cannot speak any other language. French is used in newspapers, schools, churches, radio, television, court proceedings, and legislative gatherings. An attempt is presently under way to abolish all use of English in Quebec. The province even has its own distinctive land-survey pattern, derived from French colonial times and preserved in provincial law. The political expression of the Quebec French has in recent years led to increasing demands for independence.

4. The economic expression of French Canada has historically been class division between English and French. People who spoke English came to occupy an economic upper class, dominating managerial and other high positions. To a remarkable degree, the wealth of the province was in the hands of the English. Even the old French fur-trapping interests, which dated back to the early 1600s, came under English and Scottish ownership. Moreover, the French Canadians were slower to be absorbed into the industrial life of the cities, and many remained in the rural areas until recent times. The traditional economic role of the *Canadians* as second-class citizens now lies largely in the past, because the long time English dominance of Quebec's economy is rapidly fading. Perhaps economic equality will weaken Canadian's desire for political independence. Thus language, religion, politics, and economics are closely interwoven in Canada. Such interdependence is found in many culture regions.

44. French Canadians

- have never lived under English rule.
- settled in Canada in the 17th and 18th centuries.
- had established their new country even before arriving in Canada.
- dominated the British settlers from 1760 to 1867.
